C. during the time period configured within the schedule

D. when the NetBackup Client Service is no longer running
Answer: C

13. Which client process handles connection requests?

A. bptar

B. bpcd

C. bprd

D. bpbkar
Answer: B

14. Which process is responsible for handling the mounting of media?

A. ltid

B. bpbrm

C. bptm (child)

D. bptm (parent)
Answer:A

15. Which two processes run only on the master server? (Choose two.)

A. bpcd

B. bpbrm

C. bpdbm

D. bpsched
Answer: CD

16. Which global attribute specifies how often bpsched determines if schedules are to be run?

A. wakeup interval

B. job run latency

C. schedule frequency

D. schedule backup attempts
Answer:A

17. Choose three methods to initiate catalog backups. (Choose three.)

A. manually

B. after a catalog cleanup

C. after each session of scheduled backups

D. before each session of scheduled backups

E. after each session of scheduled, user, or manual backups
Answer:ACE
