**Exam** : **646-056**

**Title** : Advanced Routing and  
Switching Life Cycle  
Services (LCSARS)

**Version** : DEMO

**1.Which two tasks are conducted as part of the Migration Plan Development service component? (Choose two.)**

- A.Review high-level description of the design requirements, capabilities, features, and functionality of the existing and proposed infrastructure solution.
- B.Analyze the business requirements to identify and align with technology and service requirements.
- C.Identify network services to be migrated.
- D.Define test scripts, use cases and scenarios that validate both operations and network management and security configurations.

**Correct:A C**

**2.Which two documents should be part of the Staging Plan Development? (Choose two.)**

- A.site requirements specification
- B.staging project plan
- C.bill of materials
- D.low-level design template

**Correct:A B**

**3.In the design phase, which two tasks are conducted as part of the produce business readiness test plan activity? (Choose two.)**

- A.Review the Network Implementation Plan, Low-Level Design, and Network Management System Design.
- B.Finalize Operations and Network Management Design and Test Requirements Document Containing Specific Tests.
- C.Verify Service Level Agreements.
- D.Identify Implementation Risks.

**Correct:A B**

**4.Which activity is performed to discuss the network implementation strategy with key stakeholders and business owners?**

- A.System Acceptance Testing
- B.Presentation of Staging Plan
- C.Conduct an On-site Discovery Workshop
- D.Business Readiness Plan Development

**Correct:C**

**5.Which service component within the prepare phase prescribes a set of activities and tasks to help identify and qualify an account for a customer opportunity?**

- A.Account Planning
- B.Account Qualification
- C.Business Requirements Development
- D.High-Level Design Development
- E.Technology Strategy Development

**Correct:B**

**6.In testing for business readiness, what are three ways that success criteria should be classified? (Choose three.)**

- A.success with needed corrective actions
- B.partial success pending next phase
- C.complete success

D.failure

**Correct:A C D**

**7.What should technical requirements and design goals be combined to create?**

- A.Detailed Design Validation
- B.Low-Level Design
- C.Service Level Criteria
- D.Systems Acceptance Test Plan

**Correct:B**

**8.Which task is conducted during the develop the systems acceptance test plan activity?**

- A.network resilience tests
- B.compare test parameters against service level requirements
- C.create logical topology diagrams
- D.turn-up and commission tests

**Correct:B**

**9.Which service component within the prepare phase includes a set of activities and tasks to help plan an account for a customer opportunity?**

- A.Account Planning
- B.Account Qualification
- C.Business Requirements Development
- D.High-Level Design Development
- E.Technology Strategy Development

**Correct:A**

**10.What is the correct order for performing the activities in the Change Management service component?**

- A.Originate, Schedule, Execute, Evaluate, Access, Communicate, Close
- B.Evaluate, Originate, Schedule, Execute, Access, Communicate, Close
- C.Evaluate, Communicate, Accept, Schedule and Execute, Originate, Close
- D.Originate, Evaluate, Accept and Schedule, Execute, Communicate, Close

**Correct:D**
