**Exam** : **HP0-513**

**Title** : AlphaServer System  
Maintenance (formerIt  
#330-610)

**Version** : DEMO

1. Where can you check an AlphaServer's serial number for warranty status?

- A. SRL
- B. CSN
- C. QRL
- D. OMNI

**Answer: B**

2. Which type of PCI bus slot is available on an AlphaServer DS10L?

- A. 16-bit
- B. 32-bit
- C. 64-bit
- D. 128-bit

**Answer: C**

3. Which AlphaServer does NOT have an interlock switch?

- A. DS10
- B. DS20
- C. DS20E
- D. ES40

**Answer: A**

4. When installing a new Alpha system, which command would you use with the Loadable Firmware Utility (LFU) to verify option firmware revision level?

- A. check
- B. update
- C. show revision
- D. list

**Answer: D**

A. pk\*\_host\_id

B. SCSI\_ID

C. pk\*\_bus\_id

D. dk\*\_scsi\_id

**Answer: A**

18. Which URL invokes Compaq Analyze on the local node?

- A. http://localhost :7902
- B. http://localhost :80
- C. http://localhost :1705
- D. http://localhost :2981

**Answer: A**

19. Two additional CPUs have been added to ES40. After the addition of these CPUs, the system does not initialize properly. What could resolve this problem?

- A. More cache needs to be added.
- B. A second power supply is needed.
- C. A second cabinet fan needs to be added.
- D. Add a voltage regulator for each CPU.

**Answer: B**

20. Which SRM command is used to verify the proper functioning of the system components during system installation?

- A. test
- B. diag
- C. boot
- D. sysex

**Answer: A**
